Fill out this survey and bring it into our office for 4 FREE CFL BULBS by April 30, 2009

First Name (as listed on bill) Last Name

Account Number (as listed on bill) Zip Code Telephone number

Return this survey today and receive your 4 FREE CFL BULBS!

Southern Indiana Power wants to find out more about your opinions regarding renewable energy and energy efficiency. We will use this information to gauge what direction you would like to see the co-op go in the future.

The information will be used only by Southern Indiana Power, and will not be sold or distributed to other firms. Please fill in one answer unless specified.

When complete, bring this page into the Southern Indiana Power office to receive your 4 free compact flourescent lighbulbs (CFLs).

Thank you for your participation!

MARKING INSTRUCTIONS Use a black or blue ink pen. Fill in the circles completely. Make no stray marks.	
Correct Marks	Incorrect Marks

Energy efficiency and renewable energy

1. In your opinion, is global warming due primarily to human actions, or natural changes in the climate, or both?
   - ○ Human actions
   - ○ Both human actions and natural climate changes
   - ○ Don't know
   - ○ Natural climate changes
   - ○ Neither - do not think global warming exists

2. How serious of an environmental concern is global warming in your opinion?
   Not at all serious ○ 1 ○ 2 ○ 3 ○ 4 ○ 5 *Very serious*

3. Below are several energy sources that can be used to generate electricity. Based on availability, environmental issues and cost, how much would you support using each one as an energy source?

	Don't support --------> Strongly support 1	2	3	4	5
a) Hydro-power (from moving water, dams).	○	○	○	○	○
b) Nuclear energy.	○	○	○	○	○
c) Solar energy.	○	○	○	○	○
d) Energy from wind turbines.	○	○	○	○	○
e) Biomass energy from landfill gas.	○	○	○	○	○
f) Other biomass energy from wood waste, turkey litter, digester gas.	○	○	○	○	○

4. How important is it that the co-op expand its electric generation resources to use more renewable energy?
   Not at all important ○ 1 ○ 2 ○ 3 ○ 4 ○ 5 *Very important*

5. To meet the co-op's future electric generation needs, which one of these is more important? *(one response only)*
   - ○ Keep rates lower using natural gas and coal generation
   - ○ Use renewable energy sources like wind, solar and geothermal power that may cost more
   - ○ Doesn't matter to me

6. In order for the co-op to use renewable energy or to reduce carbon emissions from power plants, how much more would you be willing to pay on your monthly bill?
   - ○ Up to $5 more per month
   - ○ $11 - $20 more per month
   - ○ Over $50 more per month
   - ○ $6 - $10 more per month
   - ○ $21 - $50 more per month
   - ○ Would not pay more

7. Do you have any comments about energy efficiency or renewable "green" power?
